

Cultural Center of the Philippines

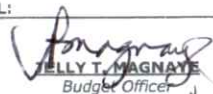

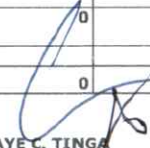

QUALITY ASSURANCE AND REVIEW (QAR) FORM
Agency: CULTURAL CENTER OF THE PHILIPPINES

PIA/P	CC Typology Used	Main Objective	CC Objective	Climate Risks Being Addressed	Climate Information Used
CCP MAIN BUILDING REHABILITATION (MECHANICAL, ELECTRICAL, PLUMBING AND FIRE PROTECTION SYSTEMS, JPGRADING, STRUCTURAL RETROFITTING AND ARCHITECTURAL RENOVATION AND THEATRICAL RESTORATION)	M611-02	To strengthen the structural integrity of the CCP Main Building as an architectural masterpiece and cultural landmark.	To mitigate the impact of anthropogenic emissions to different human and environmental systems	Global warming; Carbon Dioxide emissions or Green House Gas (GHG) emissions	"Summary for Policymakers" as posted in the website: https://niccdies.climate.gov.ph/climate-reports
		To promote energy efficiency by adopting various strategies for the wise consumption and utilization of energy, water, and other resources, while reducing electricity and water usage in daily operations to meet the standards of an environmentally friendly workplace and performing arts venue.	To mitigate future climate-related risks and hazardous conditions affecting occupants, stakeholders, and the general public while contributing to the reduction of global anthropogenic emissions to help limit global warming.		Research, project feasibility study
		To maximize the activity as an opportunity to identify, replace or upgrade ineffective and inefficient mechanisms that pose potential hazards to its personnel, community and the environment.	To contribute to the national efforts of reducing or preventing further long-term changes in the climate system caused by anthropogenic emissions		
SEWERAGE CONNECTION OF CCP BUILDINGS TO THE SEWERAGE TREATMENT PLANT (STP)	A234-01	The interconnection of sewerage systems from CCP buildings to the Sewage Treatment Plant (STP) is a critical requirement set by the Laguna Lake Development Authority (LLDA) and the Department of Environment and Natural Resources (DENR).	This project ensures compliance with environmental regulations, contributing to sustainable waste management practices and protecting the surrounding ecosystem while supporting the CCP's operational requirements.	Pollution of Manila Bay
